

- **Where you would like to be?**

- What level of the main transformer's loading will we operate at, with proposed loads to the existing system?
- Would you recommend operating at this the transformer and system at this loading level?
- What options are to serve the new proposed loads?
- What options are available to manage the cost and timing of the project if the facility is not completed simultaneously?
  - Scenario name
  - Description
  - Design approach
  - Cost and time to Implement
